

ACIDITY: THE SILENT DESTROYER

DAMAGING EVERYTHING. EVERYWHERE.

ACIDIC WATER CORRODES. STAINS. WEAKENS. DESTROYS.

HOW ACIDIC WATER DESTROYS EVERYTHING

PIPES & PLUMBING

Corrodes metal pipes, causes leaks, pinhole bursts & costly repairs.

COPPER CORROSION

Blue stains, pinhole leaks & shortened lifespan of copper plumbing.

APPLIANCES & HEATERS

Eats away at water heaters, dishwashers, washing machines & more.

HOMES & STRUCTURES

Weakens concrete, causes cracks, spalling & structural damage.

PLANTS & SOIL

Damages roots, reduces nutrient absorption & kills plant life.

AUTOMOBILES

Speeds up rust, corrodes engines, and ruins paint & metal.

HEALTH RISKS

Leaches heavy metals (lead, copper, zinc) into water—causing kidney disease, neurological issues, cancer risk & more.

ENVIRONMENT

Kills aquatic life, harms ecosystems & pollutes natural water sources.

EVERYDAY EFFECTS

Stains, bitter taste, bad odor, and discoloration in water & fixtures.
