Choose AquaRedox®.
Disinfect without adding chlorine.

What changes after a rainstorm?

Storm runoff can carry dissolved organics into source water. Some react readily with chlorine during disinfection.

About 46% more total organic halogen formed when researchers chlorinated post-storm water than when they chlorinated pre-storm water.

Wu et al. · Water Research (2026) · DOI 10.1016/j.watres.2026.126616

Inside the AquaRedox® filter

Copper- and zinc-coated activated carbon drives redox reactions in the filter bed. This disinfection step works without dosing chlorine.
