WATCH WATER®

MADE IN GERMANY

FilterSorb SCB

SCALE PREVENTION. MAGNESIUM IN WATER. BICARBONATE ALKALINITY.

Water treatment for equestrian facilities and livestock farms

- **Scale control for water systems**
- **Dissolved magnesium in drinking water**
- **Bicarbonate buffering capacity**
- **No external CO_2 dosing**

THE SCB DIFFERENCE

SP3 generates CO_2 during scale-prevention chemistry. The magnesium-based SCB component uses this CO_2 to form dissolved magnesium and bicarbonate.

WHY MAGNESIUM MATTERS

Magnesium is essential for normal ATP production and use. Drinking water can contribute to daily magnesium intake.

Mineral delivery depends on source water and operating conditions.
