WATCH WATER®

MADE IN GERMANY

FilterSorb SCB

CARE STARTS WITH THEIR WATER.

MAGNESIUM IN WATER. BICARBONATE ALKALINITY. SCALE PREVENTION.

For homes with dogs and cats

- **Dissolved magnesium in drinking water**
- **Bicarbonate buffering capacity**
- **Scale control for water systems**

THE SCB DIFFERENCE

SP3 generates CO_2 during scale-prevention chemistry. The magnesium-based SCB component uses this CO_2 to form dissolved magnesium and bicarbonate.
No external CO_2 dosing

WHY MAGNESIUM MATTERS

Magnesium is essential for normal ATP production and use. Drinking water can contribute to total magnesium intake.

START WITH YOUR WATER

Check magnesium, alkalinity and pH. Select SCB to suit the water analysis and the required mineral balance.

Mineral levels vary with water source and treatment. SCB mineral delivery depends on operating conditions. For pets on kidney or urinary diets, confirm water mineral targets with your veterinarian.
