

FILTERSORB® SP3

THE DIFFERENCE IS IN THE MEDIA.

Proprietary science. Practical scale protection. Worldwide partners.

25 YEARS
FILTERSORB® SP3

2 MILLION+
SYSTEMS VIA PARTNERS

50+ YEARS
FOUNDER'S EXPERIENCE

200+
PRODUCTS MANUFACTURED

Watch Water celebrates 25 years of FILTERSORB® SP3 and reports more than two million systems sold through its global distribution channels. The focus: specialist media, proprietary manufacturing knowledge and practical scale prevention.

ENGINEERED FOR SELECTIVE NUCLEATION

FILTERSORB® SP3 uses Nucleation Assisted Crystallization (NAC). Watch Water's double-layer-coated modified ceramic media is designed to direct calcium-carbonate nucleation and promote aragonite microcrystal formation.

PROTECTED MANUFACTURING KNOW-HOW

The proprietary formulation and manufacturing process behind SP3 are retained as trade secrets. Its distinction lies in the engineered surface and the crystallization behaviour it produces.

MORE THAN A CRYSTALLIZATION LABEL

Similar terminology does not establish equivalent media. Surface design, manufacturing methods, crystal characteristics and performance under actual operating conditions define the product.

PRODUCT-SPECIFIC EVIDENCE MATTERS

A study that did not test FILTERSORB® SP3 cannot establish a competing product's superiority over it. Crystal characterization and scale-prevention testing answer different questions; both need appropriate methods.

Scale control without conventional ion-exchange softening. Correct sizing, suitable feed water and specified operating limits are essential.

PRACTICAL BENEFITS

- ✓ No salt addition
- ✓ No continuous antiscalant dosing
- ✓ No regeneration cycle
- ✓ No regeneration wastewater
- ✓ Minerals retained in treated water
- ✓ Simple upflow operation

EXPERIENCE THAT REACHES THE CUSTOMER

Founder Deepak Chopra brings more than 50 years of hands-on water-chemistry experience. Watch Water states that every product undergoes intensive laboratory testing, typically for two to three months or longer, before release.

THE MEDIA SPECIALIST BEHIND YOUR SYSTEM

Watch Water manufactures SP3 media. Distributors and OEM partners engineer complete systems and provide local support. The wider portfolio includes more than 200 products for water treatment, wastewater treatment and air filtration.

25
YEARS

25 YEARS OF INNOVATION.
THE EXPERTISE INSIDE THE SYSTEM.
