

BROMIDE REMOVAL WITH HYDROSORB ADSORBER

MECHANISM

Hydrosorb Adsorber (positively charged) attracts and binds negatively charged bromide ions (Br^-).

ADVANTAGES

- Highly effective bromide removal
- Simple to operate
- Regenerable and reusable
- Cost-effective long-term solution

Media	Hydrosorb Adsorber
Regeneration	Simple Brine Regeneration Process Using Instant Oxydes
System design	Pressure Vessel + Clack Valve + Brine Tank
Application	Residential, Commercial, and Municipal Water Treatment
