

THE FIRST WATER DESIGNED FOR LONGEVITY

LonGeVa™ Water

Would drinking heavy atoms lengthen our lives?

The **D** stands for **Deuterium**, an isotope of Hydrogen (H) with an atomic mass of **2** instead of **1**.

Deuterium is what makes water "**heavy**"

An ice cube made from LonGeVa Water would sink in normal water, demonstrating its higher density.

Watch Water has discovered a potential ELIXIR OF LONG LIFE.

THE SCIENCE OF LONG LIFE
