

QUANTUM FLOC

WHERE MAGNETIC FORCE MEETS WATER PURIFICATION

THE FUTURE OF FLOC IS HERE

Not just chemistry — PHYSICS IN ACTION.

Quantum Floc is the world's first magnetic-force-driven flocculant and coagulant, engineered using:

- Advanced Zeolite
- Nano Titanium Dioxide
- Ferric Hydroxide Coating

HOW IT WORKS

1. Electrostatic + Magnetic Force

Quantum Floc's nano-titanium and ferric-hydroxide layers pull oppositely charged ions and particles together.

2. Massive Floc Formation

This unique tri-layer structure attracts contaminants physically and chemically, forming large, dense flocs.

3. Ultra-Fast Separation

Flocs rapidly settle or are easily filtered – reducing chemical use and increasing process speed.

KEY BENEFITS

- ✓ High adsorption
- ✓ Rapid floc growth
- ✓ Minimal sludge
- ✓ Eco-safe & metal-enhanced
- ✓ Replaces conventional chemicals
