

THE HIDDEN TRUTH ABOUT INVISIBLE CONTAMINATION

A Global Crisis the World Has Not Yet Understood

THE BREAKTHROUGH TECHNOLOGY

- ✓ TriSorb UFA is not a filter – it is a **Metallic Framework Adsorption Technology**
- ✓ Designed to capture **Ultra-Fine Pollutants (UFA)** beyond conventional filtration limits
- ✓ Removes contaminants at molecular and nano scale
- ✓ Works where **traditional media** completely fail

UFA = Uranium · Fluoride · Arsenic

- Radioactive contamination affecting kidneys & DNA
- Toxic in excess, linked to **neurological & bone damage**
- *Together they form the most critical global water crisis*

WHAT ARE UFA (ULTRA-FINE ADSORBABLES)?

The most dangerous contaminants in water are:

- ✓ **Invisible** to the human eye
- ✓ Too **small** for conventional filtration
- ✓ **Chemically stable and persistent**
- ✓ **Microplastics** ✓ PFAS / forever chemicals
- ✓ **Pharmaceutical residues** ✓ Industrial toxins
- ✓ **Nanoparticles** ✓ Hormone disruptors
- **If you cannot see it — it does not mean it is not there**

THE TRISORB UFA ADVANTAGE

- ✓ **Metallic Framework Technology**
- ✓ **Extremely high surface area**
- ✓ **Multi-layer adsorption mechanism**
- ✓ **Strong binding forces for ultra-fine contaminants**
- **Conventional technologies were never designed for Ultra-Fine Adsorption**

TriSorb UFA – The First Technology to **Remove Uranium, Fluoride & Arsenic Simultaneously.**
