

EBOLA VIRUS

PROTECTION STARTS WITH SURFACE DISINFECTION

Ebola virus is a severe, often fatal illness in humans with a very high lethality rate. There is currently no vaccine and no specific treatment.

WHO RECOMMENDATIONS

WHO recommends strengthening infection prevention and control by using effective disinfection practices.

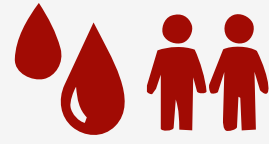

CDC recommends cleaning and disinfecting contaminated surfaces using hospital-grade disinfectants.

ABOUT EBOLA VIRUS

Ebola is a viral disease that affects humans and primates.

Symptoms include fever, weakness, muscle pain, vomiting, diarrhea, and in some cases, internal bleeding.

High fatality rate - up to 50% depending on the strain and outbreak conditions.

Outbreaks can spread quickly without proper infection control and hygiene.

WHY CHOOSE VIROLOXY® BY WATCH WATER?

EFFECTIVE

Kills Ebola virus and other pathogens on contact.

FAST ACTING

Powerful performance with short contact time.

SAFE & SUSTAINABLE

Stabilized AOP technology. No harmful residues. Environmentally responsible.

MULTI-SURFACE

Suitable for floors, walls, equipment, tools, and other hard surfaces.

IDEAL FOR

Hospitals, isolation units, clinics, public areas, and professional cleaning.

**POWERED BY
VERY STRONG AOP
(ADVANCED OXIDATION
PROCESS) OF SO₄•⁻
RADICALS**

USE IN

- Hospitals & Clinics
- Isolation & Treatment Units
- Ambulances & Vehicles
- Public Facilities
- Healthcare & Laboratory Areas
- Homes & Care Settings

EASY TO USE

DILUTE

Dissolve the required amount of VirolOxy powder in clean water.

APPLY

Apply the solution to surfaces and high-risk areas.

CONTACT TIME

Allow proper contact time for maximum effectiveness.

RINSE & CLEAN

No rinsing required. Leaves surfaces clean and safe.

POWERED BY SCIENCE

HIGHLY EFFECTIVE

RESIDUE FREE

SAFE FOR PEOPLE & ENVIRONMENT
