

WATCH DOSING

BETTER SERVICE. COMPLETE DOSING SOLUTIONS.

We are pleased to announce our entry into the dosing equipment business with WATCH DOSING — a new department of Watch Water GmbH, created to give our customers more complete support for the preparation and application of our treatment products.

100 L | 200 L

FROM TREATMENT PRODUCT TO DOSING SOLUTION

Watch Water Instant products require dilution before dosing. WATCH DOSING brings together preparation tanks, electric mixers and dosing pumps, helping customers build a practical system around the selected product and application.

WHAT WATCH DOSING OFFERS

- 100-litre and 200-litre preparation and dosing tanks
- Electric mixers / agitators for solution preparation
- Dosing pumps in different capacities and pressure ratings
- Suction assemblies, level monitoring and dosing accessories
- Application-based equipment selection
- Product-specific dilution, mixing and operating guidance

PUMP OPTIONS FOR DIFFERENT DUTIES

0.05–5 L/h
up to 10 bar

0.11–11 L/h
up to 10 bar

0.3–30 L/h
up to 3 bar

Pump selection depends on solution concentration, required dose and injection pressure. Confirm material compatibility for each product.

SUPPORTING YOUR APPLICATION

- DRINKING WATER
- BOILER WATER
- COOLING WATER
- MEMBRANE ANTISCALANTS
- OTHER LIQUID DOSING APPLICATIONS

Equipment and preparation instructions are matched to the intended use. Drinking-water duties require suitable chemicals and wetted materials.

OUR COMMITMENT TO CUSTOMERS

- Better service starts with understanding the complete application. Our aim is to help you select suitable equipment, prepare treatment solutions correctly and establish a clear dosing procedure.

WATCH DOSING

DILUTE. MIX. DOSE.

A department of Watch Water GmbH

Tell us your product, water flow and injection pressure — let us help configure your dosing station.
