

# WATCH WATER GROUP

## ADVANTAGES OF WATCH AMIN

- Use of a combination of environmentally compatible agents in proprietary technology
- Affects the structure of the protective magnetite layer in the boiler to increase protection
- The system is protected against corrosion as a membrane is formed
- Gentle removal of existing scaling from calcium carbonate and corrosion products
- Economical and ecological alternative to conventional water conditioning
- The salt content of boiler water is not increased
- Reduction of water blowdown rate
- Disperses dirt, mineral salts, and iron oxide
- Alkalinizes the entire steam system, including condensate recirculation and feed water systems
- Simple analysis for determining the Watch Amin® content of the boiler water and condensate
